

Ms. Seilnacht

University of Denver

Science

A Learning Experience that Changed Me:

I studied abroad in Pau, France my junior year of college, which completely changed the way that I view the world. Living with a French family and taking classes with students at the local university allowed me to challenge my own personal beliefs and see everything through a different lens.

My Favorite Book:

The Bluest Eye by Toni Morrison

My Hobbies and Interests:

Cooking, journaling, reading, hiking, and spending time with my family

Prior Experience in Education:

I began my career in education as an apprentice teacher here at Byers, and I'm excited to be going into my third year teaching 7th grade science!

Something Super-Unique About Me:

I spent two summers as an intern in a endocrine/biotechnology lab, and I helped to develop an early model of rapid tests for prostate and breast cancer!

Why I am Excited About Working at DSST:

I am excited to contribute to a community that truly values the uniqueness of every individual and is driven by a desire to eliminate educational inequity in our city!
