How to fix the Microsoft Teams “Send a Code” Error

To fix this we need to sign out. The screen that asks for the code needs to be closed.

Please close this window!

It may pop up a second time, if it does please close it again. A new screen will pop up saying "Uh oh Something is wrong"

Do not hit **Try Again**

It will offer to restart, instead choose the sign out button below it.

Hit Sign out! (If the button doesn’t work, **Maximize** the window)
It will then restart, please login with your dsst email now (firstname.lastname.noe@scienceandtech.org) (the box may show firstname.Lastname.Noe@dsst.local, this is incorrect) Then hit sign in.

It will then ask for a Password which is the password to the computer (this is usually Password123)
