

A Learning Experience that Changed Me:

Taking AP Chemistry in High School was the first class that truly challenged me and made me realize just how malleable learning is -- doing corrections and learning from my mistakes taught me that our knowledge isn't fixed. Plus, that class inspired me to pursue Chemical Engineering in college and ultimately led me here.

My Favorite Book:

The Scarlet Letter by Nathaniel Hawthorne

My Hobbies and Interests:

I love running, hiking, playing board games, eating good food and being around good people.

Prior Experience in Education:

I started teaching in Chicago immediately after college. I moved to Denver and taught science at DSST: Green Valley Ranch. I am excited to continue sharing my love of science with the Byers community.

Something Super-Unique About Me:

I plan to open a muffin shop with my best friend when I retire from teaching.

Why I am Excited About Working at DSST:

I truly believe that DSST places value on the important things -- strong values, and strong academics.
