

Mr. Weismiller

University of Virginia Engineering

A Learning Experience that Changed Me:

The two years I spent working as an engineer of Australia. While I learned much in the field about the geology of a new country, I learned even more about a new culture, which is both similar to and different from our own in many ways. It allowed me to see my own culture in a new and more critical light.

My Favorite Book:

To Kill a Mocking Bird by Harper Lee

My Hobbies and Interests:

I love being outside--running, cycling, hiking, snowboarding, soccer, frisbee, or anything else that's active and outdoors. I also treasure the time I have with my two boys, Cody (3) and Will (1).

Prior Experience in Education:

I just spent four years teaching math and science at DSST GVR HS. Before that I spent ten years as an environmental engineer working in Virginia, Australia, and Colorado.

Something Super-Unique About Me:

I eat a Chipotle burrito (or two!) almost every day--I'm certainly an addict. Also, I look a little bit like Chuck Norris, even though I'm not nearly as tough. My students love to kid me about this.

Why I am Excited About Working at DSST:

There is much inequity and inequality in this country, and it's only getting worse. Much of it is along racial and socioeconomic lines. I truly believe that in the long run education is the best way to end this, and by teaching at a place like DSST I feel I am making a small difference in the world by doing something useful to help those students who need it most.
