Physics

A Learning Experience that Changed Me:

My first year teaching taught me more than I could have ever imagined. My students showed me how different and enjoyable a classroom can be when we all have each other's best interest in mind and really care about one another. Since then it has been my goal to learn as much as I can about each of my students and connect with them beyond what we cover in the classroom.

My Favorite Book:

Still taking recommendations!

My Hobbies and Interests:

Field hockey, lacrosse, traveling, & any outdoor activity I can do with my dog!

Prior Experience in Education:

I graduated with a BS in Physics in 2015 and started teaching at Quincy High School (Quincy, MA) the following school year. I also have coached multiple field hockey and lacrosse teams and camps around New England.

Something Super-Unique About Me:

I will always be a New England Patriots fan! Go Tom Brady!

Why I am Excited About Working at DSST:

I am beyond excited to have the opportunity to be a part of the community at DSST. I have a passion for STEM education and I feel so fortunate to be able to be a part of bridging the gap for all students! Most importantly I have a heart for building relationships. I love getting to know students and helping them realize all they have to offer and how special they are as individuals.
