

Mr. Millman

Old Dominion
University
Science

A Learning Experience that Changed Me:

While enrolled in Invertebrate Zoology at ODU, my professor announced that he would be hiring a research technician to work in his laboratory. I applied, was offered the position, and had the experience of a lifetime exploring and learning about aquatic ecosystems in the coastal waters of Virginia!

My Favorite Book:

Moral Ground: Ethical Action for a Planet in Peril by Wangari Maathai

My Hobbies and Interests:

I love spending time in the outdoors, playing the five-string banjo, and exploring my new home of Denver.

Prior Experience in Education:

This is my first year in a school setting but I taught on The Learning Barge, a floating classroom that was moored on the banks of The Chesapeake Bay– the largest estuary in North America.

Something Super-Unique About Me:

I worked for the Virginia Department of Game and Inland Fisheries at a fish hatchery where we grew and stocked striped bass (fish in the photo above) to supplement and manage wild populations. No fish were harmed in the taking of this photo!

Why I am Excited About Working at DSST:

I am excited for this new adventure, and to share my passion for conservation of our nation's natural resources with the next generation of conservationists.
